PETROPHYSICS is published bimonthly by the Society of Petrophysicists and Well Log Analysts (SPWLA). Subscription is included in annual dues for members. Library Subscription cost is \$250 (6-issues, Feb, April, June, Aug, Oct, Dec) Send Subscription and member address changes to the SPWLA business office. Back issues if available are \$35 each to members and \$45 each to library subscribers.

ADVERTISING RATES: (based on one-time, full color) Full Page: \$1500, Half Page: \$1200, Quarter Page: \$1000. Additional fee for printing on covers. Media kits are available by contacting the SPWLA business office or by visiting the SPWLA website www.spwla.org. Responsibility: The statements and opinions expressed in PETROPHYSICS are those of the authors and should not be construed as an official action or opinion of the Society of Petrophysicists and Well Log Analysts, Inc. © Copyright 2017 by the Society of Petrophysicists and Well Log Analysts, Inc.

About the Cover

A machine-learning workflow. Parameter-log pairs are fed into the machine-learning model to train the model. Then in the prediction phase, the borehole and formation parameters are input into the model, and logs are predicted as output. The machine-learning model can be a variant of different models. See the article by Xu et al.

Contents

737 From the Editor

TUTORIAL

739 **Capillary Pressure Tutorial Part 3—The Jungle Gives Us Many Things**
David Patrick Murphy

ARTICLES - PETROPHYSICAL DATA-DRIVEN ANALYTICS (PDDA)

748 Introduction to the Special Issue on Petrophysical Data-Driven Analytics (PDDA)

750 **Geological Feature Prediction Using Image-Based Machine Learning**
T.D. Jobe, E. Vital-Brazil, and M. Khait

761 **A Rigorous Data-Driven Approach to Predict Poisson's Ratio of Carbonate Rocks Using a Functional Network**
Zeeshan Tariq, Abdulazeez Abdurraheem, Mohamed Mahmoud, and Adil Ahmed

778 **Borehole Resistivity Measurement Modeling Using Machine-Learning Techniques**
Yankai Xu, Keli Sun, Hui Xie, Xiaoyan Zhong, Ettore Mirto, Yao Feng, and Xiaobo Hong

786 **Data-Driven Interpretation of Ultradeep Azimuthal Propagation Resistivity Measurements: Transdimensional Stochastic Inversion and Uncertainty Quantification**
Qiyang Shen, Jiefu Chen, and Hanming Wang

799 **Intelligent Logging Lithological Interpretation With Convolution Neural Networks**
Liping Zhu, Hongqi Li, Zhongguo Yang, Chengyang Li, and Yile Ao

811 **Use of Data Analytics to Optimize Hydraulic Fracture Locations Along Borehole**
Ishank Gupta, Chandra Rai, Deepak Devogowda, and Carl Sondergeld

826 **Comparative Study of Shallow Learning Models for Generating Compressional and Shear Traveltime Logs**
Jiabo He, Siddharth Misra, and Hao Li

841 **Support-Vector-Machine Phase Classification of Downhole Leak Flows Based on Acoustic Signals**
Atchuyta Ramayya Venna, Yi Yang Ang, Nam Nguyen, Yinghui Lu, and Darren Walters

849 **Fluid Optical Database Reconstruction With Validated Mapping from External Oil and Gas Information Source**
Dingding Chen, Christopher Jones, Bin Dai, and Anthony van Zuilekom

863 **Machine-Learning-Based Automatic Well-Log Depth Matching**
Timon Zimmermann, Lin Liang, and Smaïne Zeroug

873 **Data Preconditioning for Predictive and Interpretative Algorithms: Importance in Data-Driven Analytics and Methods for Application 1**
Elton Frost Jr. and Terrence Quinn

891 Annual Index

Full-Color versions of all technical articles are available in the digital edition of Petrophysics, which is free to SPWLA members and can be found at Recent_Petrophysics_Journals.aspx.

The Society of Petrophysicists and Well Log Analysts is dedicated to the advancement of the science of formation evaluation through well logging and other formation evaluation techniques. SPWLA is dedicated to the application of these techniques, to the exploration and exploitation of gas, oil and other minerals. PETROPHYSICS publishes original contributions on theoretical and applied aspects of formation evaluation; particularly well logging and petrophysics.
